

Self Documenting Reports

When creating reports in Brio, which will be distributed to many people via the Brio Repository or the On Demand Server, an additional Free Form Report or EIS can be used to contain documentation about the report. This method is nice because the documentation is always available inside the report instead of external to the report and makes it easy for the end user to find. You can put whatever information into a READ ME area (I used an EIS section and renamed the section by double clicking on the section name, then typing READ ME). If a lot of reports are being created, you can create a template for the READ ME area that can be used in each report so there is a consistent look and feel to your documentation. The example below, just identifies some topics that can be included in the READ ME area.

Cabri Ltd. is a training company, distinguished by our in-depth knowledge of data warehouse query tools and industry insight. We specialize in product training, installation and custom course development for communication, manufacturing, e-business and public agency clients. Our focus is providing customers with innovative solutions and "value-added" approaches for training and product implementation.

Cabri Ltd. provides high quality training and consulting services at competitive prices. We maintain the highest standards of integrity with our customers and employees, priding ourselves in the quality training and customization services offered by our staff of trainers and developers.
